"A Dentist is a Lifetime Medical Professional, part Artist, part Architect, part Entrepreneur, part Engineer, part Physicist, part Surgeon, part Businessman, part Therapist, and part Community Friend."

Micro Biography

Dr. Kianor Shah is a practicing dentist, inventor and an entrepreneur from Palm Desert, California. As a traveling healthcare provider, Dr. Shah has practiced in more than 300 offices. As a businessman, Dr. Shah has built numerous cobrand, private label, and doctor-to-doctor partnerships in the healthcare industry. Dr. Shah completed his undergraduate studies at Western Illinois University as a Summa Cum Laude, where he earned a Bachelor of Science in 2000. Dr. Shah graduated in 2006 with a Doctorate in Dental Medicine from Southern Illinois University. He completed an MBA program at Brandman University in international business in 2016. His participation as a fellow of the International Congress of Oral Implantologists, fellow of the California Implant Institute, and fellow of the International Academy of Dental-Facial Esthetics has culminated in his Mastership and Diplomate status of the International Congress of Oral Implantologists. Dr. Shah has been in various roles as a founder, owner, chairperson, CEO, president, managing director, partner, associate, and consultant for a variety of domestic and international related business matters. Dr. Shah is also the founding regent of the Global Summits Institute. Dr. Shah currently serves as a key opinion leader for a host of companies and organizations. In addition to his expertise practicing general dentistry, Dr. Shah practices in the fields of prosthodontics, periodontics, endodontics, pedodontics, orthodontics, and oral surgery. Dr. Shah reads, writes, and speaks English, German, and the Farsi languages. Dr. Shah enjoys world travel, public speaking, studying, and researching historical events, and participating in sports including soccer, table tennis, and fitness. "I love the look on a patient's face when he or she looks in the mirror post smile design and witnessing the emergence of a new-found confidence. The value in that cannot be measured by numbers." He is also the founder of OneHolo.ai, developing human-supervised conversational AI systems for customer and clinical-administrative workflows.
